

“School Business Services have provided us with ICT support since 2005 and have proved themselves to be extremely reliable. Our visiting School Business’s technician, coupled with the telephone support line, is invaluable; any problems we have are always dealt with promptly and efficiently. School Business Services initially set up our fantastic ICT Suite and have also supplied us with a large amount of new hardware including servers and workstations. The whole process, from initial consultation to installation, was carried out professionally and with very little disruption to the school. School Business Services also support our Management Information System (MIS); the migration of our data to using SIMS.net has been challenging and at the same time achieved with no disturbance to our valued administrative staff.

I have no hesitation in wholeheartedly recommending them and look forward to many more years of continued good service”

***Linda Healy, Network Manager  
Christ Church Primary School***
