

“Monkston Primary school has shared a solid working relationship with ‘School Business Services’ for the past 3 Years. Initially after offering a competitive quote SBS have delivered ICT services to the school through the management of our network including Laptops, Server, Software and Wireless Network. The technicians have done an amazing job ensuring that some of our older equipment has continued to function especially over the last year when our server was constantly failing”

“Our relationship with SBS has grown further over the last 12 months with them winning the contract to install a new wireless network as well as our new server both of which are working effectively. This work has ensured that we have a fast and secure network that both the staff and students are able to access in order to support any work on the National Curriculum. I look forward to our good business relationship continuing and hope that they will continue to offer competitive prices in the future”

Craig Rhodes
ICT Co-Ordinator
Monkston Primary School
