

SBS have supported the United Learning Trust in multiple instances where a SIMS application has had to be migrated from a predecessor school into a new academy. Not only do SBS have excellent knowledge of the SIMS application and the implications when moving data, they have very good SQL Server and database skills and have managed the migration of SIMS applications in ULT academies across to new servers. SBS have always approached any task given to them with professionalism and commitment. I would have no hesitation in recommending SBS to any organisation.
