

Windows Server 2016 End of Support

Take
action
now!

Running Windows Server 2016? Your school's IT systems are at risk. After **12th January 2027**, **Windows Server 2016** will no longer receive security updates, leaving sensitive student and staff data exposed and non-compliant with DfE standards.

Why upgrade now?

- ✓ Maintain **DfE compliance** and keep critical security updates active
- ✓ Protect your systems from **cyber threats** like malware and ransomware
- ✓ Ensure your servers and applications remain **stable and fully supported**

Benefits of upgrading

Upgrading to a supported Windows Server version provides modern **security protections, safeguarding data** and keeping your IT infrastructure **reliable, secure, and compliant** with government guidelines.

Don't wait - January 2027 is closer than you think.
Act now to secure your school's IT future.

Upgrading made easy with three simple steps

1

Assess

We assess your current systems to check **Windows Server 2025** compatibility. If any additional upgrades, hardware replacements, or adjustments are required, we will work with you to plan the migration smoothly and efficiently.

2

Deploy

We create a strategic timeline to ensure a smooth **Windows Server 2025** transition, minimising disruption to teaching, learning, and administrative operations.

3

Support

Our technical team manages the entire **Windows Server 2025** upgrade process, providing expert guidance and support from the initial assessment through to post-upgrade troubleshooting, ensuring your systems run smoothly and securely.

Book your review today

With an upgrade to **Windows Server 2025** we can help ensure your school's compliance, security, and efficiency.
