

## BeDifferent Federation Testimonial

---

"We have been an ICT customer of School Business Services for over 7 years. I find them extremely helpful and knowledgeable. They always do their utmost to provide a professional service in a friendly and unthreatening way.

Since School Business Services have been providing us with their ICT support service the amount of time any equipment or software is not being used due to faults has reduced dramatically. If issues do occur SBS is excellent at addressing the issue and correcting it as quickly as possible. This we find exceptional and has helped encourage staff to use IT as they know if they have problems they will be sorted quickly.

SBS have carried out several ICT projects all of which have been completed to a high standard in conjunction with their 5-year budget plans they provide our Federation with which has been invaluable in refreshing our ICT hardware requirements."

**Jane Christopherson**

School Business Manager
