

Christ Church Primary School Testimonial

Christ Church Primary School has enjoyed a very productive and strategic partnership with School Business Services support for several years. During this time, our technical support needs have been met to a very high level of satisfaction. The service we benefit from is technically highly skilled, thorough, efficient and reliable.

It is of particular importance to me that School Business Services shares and helps to shape our vision for how ICT can impact positively upon the education, lives and life chances of young people.

School Business Services' technician has become an invaluable member of the school staff, with his knowledge and experience within the education sector. This has proved vital in the development of our school's infrastructure.

School Business Services conducts a yearly full audit of our network, providing an accurate assessment of our existing infrastructure. This consequently relieves me of a lot of pressures when it comes to making critical decisions for our whole network stability, along with keeping our network healthy and secure.

School Business Services supports the maintenance and upkeep of ICT at Christ Church Primary. Their work has always been of a very high standard and I recommend them without reservation.

Linda Healy

Network Manager
