

## Trust in Learning Testimonial

---

"We've been using SBS Budgets in our Trust for last 2 years and we're really pleased with both the functionality of the product and the quality of the support from the Team. The product is easy to use to manage our staff and create various scenarios around, new posts, projected pay rises etc and interacts with our accounting software to be able to import/export budgets.

The support team are always available during working hours to deal with our queries and so far our queries have all been dealt with on the same call or if not within the same day. I would be happy to recommend them."

**Drw Cannon**  
Director of Finance
