

Castle Academy Testimonial

I wish to take this opportunity to share my experiences of the SBS Online 11 software package. I was satisfied with the Version 10 but recognised that some aspects of the spreadsheet were cumbersome to work with although the resulting reports were excellent.

However, the Version 11 has addressed all the minor failings in the previous version and then improved it some more! The new format is easy to work with, allowing budget changes to be made simply and quickly. The new reporting format is clear and uncluttered with our Governors finding it easy to follow and understand.

As one of the first schools to trial this new version with 'real' data there was the potential for flaws to be revealed in the product, but I found none. The product had been meticulously tested before being released to the trial schools and so the whole experience was a pleasure. The backup and support from the office, in particular Richard, was exceptional. Richard has a thorough understanding of this product and could offer technical support as well as answer any queries.

In conclusion I would like to say that I would highly recommend this product to any school, whether they be an Academy or a Local Authority maintained school. I look forward to continuing to work with SBS.
