

SIMS Health Checks from SBS

Are you getting the most from your MIS System?

Our Health Checks are designed to ensure that SIMS is being used effectively and efficiently in your school.

Our process is designed to suit you:

- 1** We will visit your school and complete a consultation based on the use of your SIMS system by a range of key staff
- 2** A Data for Improvement evaluation will be completed on behalf of the school
- 3** A full report will be provided for the School Leadership Team (SLT) in both text and graphical form to reveal the areas where improvements and timesaving could be made
- 4** We can use these reports to discuss the MIS section of the School Improvement Plan with SLT, including training requirements and provide evidence of best practice for Ofsted

Discussion points include:

- Management and security of data
- Data diagnostics and integrity
- Consistency of data entry
- Job roles and tasks undertaken
- Data tidy processes

“I have always been extremely satisfied with the level of service provided by SBS. I have always taken any opportunity to recommend their services to colleagues from other schools, and will continue to do so.”

John Donovan | Data Manager | Walthamstow Academy
