

ICT disaster recovery solution

Is your school protected from a ransomware attack?

Ensuring business continuity for your school, we offer an affordable disaster recovery solution to backup, secure and restore data in the event of an attack from ransomware, such as the CryptoLocker.

Backup as much data as you need *offsite*, where it is out of reach of virtual threats:

CryptoLocker and School Data

Once it has targetted your server, it will seek and infect all *onsite* data storage, as depicted below:
