# Analyse your MAT SIMS data with ease!

Ideal for SLT, SBS has developed a solution to enable MATs to launch multiple hosted SIMS Discover applications from a single PC.

- Saves valuable time
- Reduces configuration of workstations & databases
- Provides access to pupil data analysis across your MAT

The SBS MIS team worked with Greenwood Academies Trust (GAT) to develop a web-based dashboard that would provide instant access to its 32 schools. **See right** ▸
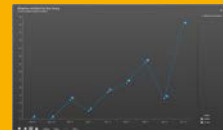

Maximise SIMS Discover

SIMS Discover enables you to easily analyse pupil data in a variety of effective graphical formats, such as bar graphs, line graphs, pie charts and Venn diagrams.

- Gain clarity on the performance of your schools and the MAT as a whole
- Quickly identify trends in pupils
- Track pupils and make interventions early on

SBS can provide support, training and setup for the SIMS Discover application if required.
