

Promote wellbeing and learning

Reducing the impact of lockdown on your students

The Thrive Approach® offers practical tools and training to promote wellbeing and help prevent mental health issues for all children and young people:

- Thrive-Online® is a web-based profiling and action-planning tool that enables you to measure and monitor progress.
- Interactive webinar training equips you with knowledge, insights and resources to proactively support the wellbeing of all children and young people.

Take advantage of Covid-19 catch-up funding and/or Pupil Premium to invest in Thrive and unlock your Recovery Curriculum.

- Thrive-Online web-based software package – FREE 30-day trial
- Thrive Together induction training materials to share with your team - Module 1 FREE

Emotionally resilient children will engage with learning

Based on established neuroscience, attachment theory and child development, Thrive has been developed over the past 25 years to offer a powerful way of working with all children and young people to support their social and emotional development.

- A whole school approach to wellbeing
- Easily embedded in the curriculum, and without additional workload
- Uses play, creativity and the arts to build positive and supportive relationships
- Offers a reparative focus for those requiring additional support
- Creates more confident, curious and capable students who are better able to access their learning

*Offer available to School Business Services customers for the Senior Leaders course during the Autumn 2020 term, with a maximum of 2 places per setting. Settings must be new to Thrive.
